

## Introduction

In the blink of an eye... that's all it takes for a dangerous chemical to splash into your eyes or burn the body. Without the proper safety shower or eyewash station on site, you or your workers could suffer severe injury or permanent impairment.

Pratt Safety Systems range of safety showers & eyewash stations fully comply with Australian, New Zealand and American standards and are constructed using high quality stainless steel, which ensures your workplace is using the ultimate in water first aid to deal with unexpected industrial accidents involving harmful substances of flames.

## Portable Units

With Pratt Safety's portable eye & body wash units, you can have a safe & compliant workplace no matter where you are.

**SE4050**

**Gravity Fed Portable Eyewash**

**Features**

- 53Ltr self-contained unit provides 15 minutes of decontaminating water flow.
- Strong polyethylene construction with fold-up tray that protects against airborne contaminants.
- Includes one complimentary bottle of SE4767 water additive.

**SE4000**

**Gravity Fed Portable Eyewash**

**Features**

- 79 litre capacity
- Eye/face combination wash
- Pull-down Gravity Flow wash units
- Strong Polyethylene construction

**SE50P**

**SE590A**

**Features**

- SE50P – 9 Ltr capacity aerated eye & body wash.
- SE590A – 45 Ltr capacity, with dual nozzle eyewash & drench hose.
- SE592A – 45 Ltr capacity with drench hose only
- SE597 – 16 Ltr capacity with drench hose

All units (excluding SE4050) provide soft aerated water and can be re-filled with both water & compressed air by anyone.

**SE4764**

**Water Additive**

**Features**

- Add to eyewash to protect against bacteria, algae and other micro-organisms.
- One bottle protects 23-75ltr of potable water for 3 months

**SE920**

**Laboratory Unit**

**Features**

- Hand held aerated drench hose for use with lab work or when working with small doses of dangerous substances.

# Emergency Safety Showers

## Combination Units

Pratt has your whole body covered with its Combination units – a safety shower and eye/face wash in one. These stainless steel units feature a conical showerhead ensuring whole body coverage and advanced Aerostream and Softstream nozzles, designed to gently cover the entire eyes and face.

### Selection Chart

Model Number	Eye Wash	Face Wash	Bowl	Foot Operated	Aerated Nozzles

\*Please note that all units are hand operated.

Pratt's Safety Showers collection soothingly delivers a large volume of water in a precise water pattern ensuring whole body coverage.

- SE253** – Free standing stainless steel deluge shower, manual activation.
- SE253PO** – Free standing stainless steel deluge shower, platform activation.
- SE227** – Wall mounted stainless steel deluge shower, manual activation.
- SE220** – Ceiling mounted stainless steel deluge shower, manual activation.

## Eye and Face Wash Units

Pratt's eye and face wash units are the ultimate in water first aid. Using innovative nozzle designs, these units deliver a soft curtain of water to rapidly douse the eyes area or the entire face. Constructed of quality stainless steel these units can be installed in hazardous areas with confidence.

# Emergency Safety Showers

## Multi-Spray Units

Constructed entirely from stainless steel and featuring up to 16 individual shower spray heads, the Pratt range of Multi-Spray units will provide the highest level of protection against contamination from hazardous materials such as acid or caustic liquids and toxic or radioactive particles. These units are designed for the most adverse conditions and can include an integrated eye/face wash unit and platform activation from the floor-plate.

## Selection Chart

Model Number	Number Of Spray Heads	Integrated Wash Eye/Face	Platform Operation	Number Of Stainless Steel Panels
SE340	16			2
SE300	10			1
SE301	10			0
SE340PO	16		•	2
SE670PO	16	•	•	3
SE670	16	•		3
SE663PO	16	•	•	2
SE663	16	•		2

## Anti-Scald System

Solar and environmental heating of the pipe systems can cause temperatures to rise far above the safe ranges of 15-35°C, which could cause further injury or accelerate chemical reactions.

The Pratt Anti-Scald System uses a heat sensitive valve that automatically opens to bleed away the water when the temperature in the shower pipe reaches 35°C, then closes again once a safe temperature is achieved.

Water consumption is generally minimal and can also be collected and re-circulated if desired.
