

## Dräger DrugTest® 5000 Drug Testing Device

The Dräger DrugTest® 5000 system is a fast, accurate means of testing oral fluid samples for drugs of abuse, such as amphetamines, designer amphetamines, opiates, cocaine and metabolites, benzodiazepines, cannabinoids, and methadone. The analyzer offers easy data management with the Dräger Diagnostics Software. **FOR LAW ENFORCEMENT USE ONLY.**

## Benefits

---

### Easy Evaluation

The DrugTest 5000 system is designed for easy drug screening and accurate results.

- Quick and simple to operate
  - User-friendly design
  - On-screen instructions guide you through the drug test
- 

### Quick Confirmation

The device controls analysis time and internal temperature for accurate results. Positive results can be confirmed with a second oral fluid sample via an independent, third-party laboratory analysis. Results are available online in a matter of days.

---

### Two Step System

System components include:

- DrugTest 5000 Test Kit: a ready-to-use test cassette with a built-in sample collector and volume adequacy indicator.
  - DrugTest 5000 Analyzer: a rechargeable, fully automated analyzer providing controlled accurate analysis on site.
- 

### Stores, Manages, and Prints Results

The analyzer stores the last 500 test results, along with the date and time. You can enter additional subject or test details using the compact keyboard. Data can be downloaded to a PC or printed using the Mobile Printer.

---

### Non-Invasive

To protect both you and the donor, sample collection is completely non-invasive. When the cassette is handled correctly, you will not come into contact with the donor's oral fluid.

---

### Evaluates Unknown Substances

You can also evaluate an unknown substance right on the spot. Simply collect a sample with the Surface Sampling Kit (SSK) 5000, transfer it onto the collection tip of the test kit, then analyze the sample for immediate results.
